	3-Non-Remedial, Human Caused Condition.
	4-Hydrologic Modifications.
	5-Natural Physical Features.
	6-Substantial, Widespread Social and Economic Impact.
Use Determination & Recor	nmendation:
	ince November 28, 1975?
Comments: The U	JAA survey was conducted in October 2008 and no evidence of
WBC	R was observed. A 2005 noted shotgun shells along the stream. No
interv	riews were conducted during the 2008 UAA.
Is the evaluated use a	attainable?
	tream did not meet the maximum or median depth criteria at any of the
	evaluated. However, a 2005 UAA found the stream to be meeting the
	num depth criterion. Because the stream has met the maximum depth
criter	ion, the committee recommends that the WBCR use designation be
retain	ed. Due to evidence of secondary contact recreation (SCR), the
comm	nittee recommends that the SCR use be assigned.
Committee Recommendation: Add Use Retain Use Remove Use	
	Modify Use Inconclusive
